## Diesel Engine

- Model: **QSB8.9-G33**
- Leading in-cylinder combustion technology gives the engine basic platform excellent reliability and durability, good inheritance, long-lasting advantages, and easy upgrades;
- Integrated oil and water pipelines replace traditional hoses, eliminating the risk of leakage;
- Enhanced cooling and lubrication functions effectively extend the service life of the engine;
- Cummins high-pressure common rail fuel system (HPCR) realizes multi-point injection, rapid throttle response at different speeds, more efficient power output, better fuel economy and lower noise.
- Two-stage dual fuel filters ensure a balanced level of particle dispersion, maximize the life of the fuel filter, and protect the main components of the fuel system.
- Emission standards: Meet the National Phase III emission standards;
- The engine may be operated at :  
1500 RPM up to 2000 m and 104 ° F (40 ° C) without power deration.  
For sustained operation above these conditions, derate by 4% per 300 m, and 3% per 10 ° C.
